DELPHIN CONTROL

ASSOLOMBARDA

Filiera Energy Sustainable Global Chain

WHO WE ARE

Delphin Control was born in Voghera in 2012 thanks to the thirty years work experience of the owner.

The company is now a small reality with a consolidated know-how in the Non Destructive Testing (NDT) field, Inspection and Expediting.

We have also recently introduced a mechanical and/or structural design service.

The main areas in which we operate are the Oil&Gas, Naval and Industrial.

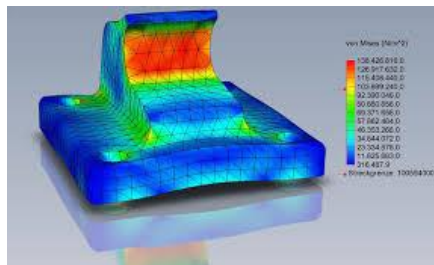

Delphin Control works by making itself available to the client, with a quality and reliable service, respecting the time and standards defined by the customer.

SERVICES

NON DESTRUCTIVE TEST (NDT)

Mainly used for Quality Control and Maintenance of plants and structures. Methods used:

- Visual Test (VT)
- Penetrant Test (PT)
- Magnetic Particle Inspection (MT)
- Ultrasound Inspection (UT)
- Positive Material Identification (PMI)

INSPECTION

We can perform metal inspections on plants and equipment in the manufacturing, pre-service and service stage.

EXPEDITING

Delphin Control supports its clients in the management of the suppliers and/or projects.

MECHANICAL-STRUCTURAL DESIGN

We use engineering software in order to offer:

- 3D modelling, 2D drawings
- Static Analysis
- Thermal Analysis
- Modal Analysis
- Buckling Analysis
- Fatigue Analysis
- Topology and Parametric Optimizations
