

Offering its customers , processors and users, innovative and sustainable materials for the flexible packaging of food, beverages, hygiene and industrial products: this is the mission of ITP which, since 1973, has been producing polyolefin films in reels for the Italian market and exported globally. The company embraces with conviction a model of circular economy, in 2020 achieved two important certifications: Cyclos and PSV (Plastica Seconda Vita).

Recyclable single film composed of one layer of barrier PE. For use in the food sector, through the realisation of any kind of pouch or as top of trays. Cyclos certified.

Vacuum mono film for thermoforming where the high barrier does not compromise the complete recyclability.
