Ralphmed Biomedica s.r.l.

who we are:

Ralphmed Biomedica srl, is an Italian company leader in the production and marketing of medical and surgical products.

The company is extremely attentive to all the possible needs of its customers

The business was born as a startup in the health care sector. The proposed service responds with specificity and immediacy to market demands, which the company knows how to anticipate, listen to and make its own. Ralphmed Biomedica srl, now structured and consolidated in the territory, implements a competitive strategy that goes against the grain, but above all is innovative.

product description

Matrix consisting of a thin sterile ribbon of collagen type 1 obtained from porcine collagen type 1, treated with pepsin, highly purified.

It is indicated to help the development of new lymphatic pathways following or in conjunction with physiological surgical procedures for the treatment of lymphedema (lymph node transfer and transplantation, lymphatic-venous anastomosis)
